- 6:00 pm–6:30 pm Registration
- 6:30 pm–6:45 pm Dinner served
- 6:45 pm–7:00 pm PVMA Update
- 7:00 pm–9:00 pm Clinical Pathology Conundrums: Common Veterinary Clinical Pathology Issues in General Practice

District 8 Counties

Lehigh, Carbon, Schuylkill, Berks, and Northampton

Clinical Pathology Conundrums: Common Veterinary Clinical Pathology Issues in General Practice

Clinical pathology can be a very useful tool in the general veterinary practice, but often there are topics that get ignored, either because they can be confusing or because their significance is not known. The purpose of this presentation is to overview some of these issues, including quality control in the in-house laboratory, basic cytologic

principles, and hematology scattergrams. The hope is at the end of this presentation, the clinician will have a better understanding of how to integrate veterinary clinical pathology into every day practice.

Continuing Education

1.5 hours of approved continuing education credit will be provided by the Pennsylvania Veterinary Medical Association.

Kristin Fisher, DVM, MS, DACVP (Clinical Pathology)

Dr. Kristin Fisher joined Valley Central Veterinary Referral and Emergency Center in August 2016 and is board-certified in clinical pathology. She studied Zoology and earned her bachelor's degree from The Ohio State University. She graduated from the Western University of Health Sciences, College of Veterinary Medicine in 2012 and completed a three year clinical pathology residency at Purdue University in 2015. During her residency, she also received a master's degree in comparative pathobiology.

Dr. Fisher has presented several times at the American College of Veterinary Pathologists Annual Meeting. She has participated in numerous studies involving a variety of specialists and enjoys working closely with clinicians. She has given many lectures on veterinary clinical pathology to undergraduate and veterinary students, veterinary technicians, interns and residents. Dr. Fisher's clinical interests include hematopathology, surgical pathology and cytology, clinical chemistry, and infectious disease. Her goal is to make clinical pathology understandable and easily accessible and to provide accurate and timely results in order to facilitate diagnosis and treatment.

Dr. Fisher currently lives in Easton, PA, with her husband, Alex, her dog, Lily, and her two cats, Figaro and Skittles. In her spare time, she enjoys hiking, cooking and traveling.
